

### Linn-Mar Teacher Quality Student Achievement Committee

The mission of Cognitive CoachingSM is to produce self-directed persons with the cognitive capacity for excellence both independently and as members of a community. Cognitive CoachingSM is a research-based model that aims to increase teacher’s metacognition. Throughout the four day seminar teachers will learn to develop trust and rapport with the people they are coaching. They will be instructed how to use the planning and reflecting conversations. They will apply the four support functions to their roles, and finally they will develop higher levels of efficacy, consciousness, craftsmanship, flexibility and interdependence.
